NZ ORCID Consortium newsletter #24

In this issue of the New Zealand ORCID Consortium newsletter:

Advisory Committee

The advisory committee will meet next year on the 21 March 2023. The agenda and minutes of the meeting will be posted on our website. If you would like anything to be added to the agenda, you can contact your sector's representative on the committee.

ORCID Board

We sincerely thank Associate Professor Katharina Ruckstuhl, Associate Dean, Māori – Manutaki Tuarua Māori, at the University of Otago – Te Whare Wānanga o Otāgo for serving on the international ORCID Board for the past two years. Her leadership and expertise have been much appreciated and we look forward hearing her reflections at the next advisory board meeting. In the meantime, six new representatives have been elected to serve on the ORCID Board for a three-year term starting in 2023.

ORCID celebrates 10 years of service

The first ORCID ID was created a decade ago and there are more than more than 4,000 live ORCID integrations today. The ORCID team summarise ten years of achievements in a blog and describe the emergence of their Persistent ID service in *ORCID's First Decade: From Startup to Sustainability.*

ORCID webinars

I'm a member, now what is designed to help new members get the most out of their memberships and to accelerate both their integration development and the uptake of ORCID within their organizations. The most recent session, on 29 September, focussed on the ORCID Member Portal, including account management, tools, reports, and best practices. The next webinar in the series will be held on 2 February 2023: Integrating with ORCID

iD & Me is the first session in a series of webinars about the benefits of using an ORCID record for researchers in the Humanities and Social Sciences.

Article: The disambiguation of people names in biological collections

Quentin Groom and co-authors review and propose best practices for the disambiguation of people who have contributed to historical scientific collections in recent Biodiversity Data Journal paper (https://doi.org/10.3897/BDJ.10.e86089).

Australian report quantifies incentives to invest in identifiers

A cost-benefit analysis has revealed using persistent identifiers in the Australian research sector could save $24 million per year and 38,000 person days in wasted effort every year.

DSpace Capabilities for Institutional Repositories

DSpace is now a certified ORCID Service provider. This open-source repository software has partnered with 4Science for improved ORCID integration that authenticates and synchronizes data. More information is available here.
