Ocean Acidification Teacher Workshop

Looking for interesting and practical activities for your science classroom that relate to real world problems? This workshop will provide resources and support to inspire and guide your students through meaningful investigations that will help them understand our local marine environment and the pressures it faces.

The workshop will focus on “The Ocean of Tomorrow”, an educational resource unit for secondary schools with a focus on the impact of climate change and, more specifically, ocean acidification on the marine environment.

The session is aimed at secondary teachers (biology, chemistry, general science) and educators with an interest in environmental issues. Some of the activities and experiments outlined in the resource book will be demonstrated and there will be a talk by Professor Mary Sewell, University of Auckland. Free copies of “The Ocean of Tomorrow” will be distributed.

When: Thursday 9 November 2017 | 1.30pm – 3.30pm

Where: King’s College | Golf Avenue | Otahuhu | Auckland 1062

To reserve a place please email marine-studies@otago.ac.nz or phone 03-479 5826
