

BEYOND GROWTH

How to create an economy that doesn't cost the Earth

Tim Jackson

Christine Kenney

Jonathan Boston

Lynn Freeman

Capitalism is broken. The relentless pursuit of more has delivered climate catastrophe, social inequality and financial instability.

Weaving together philosophical reflection, economic insight and social vision, Tim Jackson's passionate and provocative writing dares us to imagine a world beyond capitalism—a place where relationship and meaning take precedence over profits and power. For this evening event, award-winning UK ecological-economist and writer, **Tim Jackson**, discusses his latest book *Post Growth: Life After Capitalism* with specialist in disaster risk reduction **Christine Kenney**, and public policy expert **Jonathan Boston**. Broadcaster and environmentalist **Lynn Freeman** chairs the conversation.
