## NZ ORCID Consortium newsletter #19

In this issue of the New Zealand ORCID Consortium newsletter:

[Welcome to 2021](#)

[Town Hall](#)

[ORCID webinar on indigenous data sovereignty](#)

[ORCID and two factor authentication](#)

[ORCID Member Survey](#)

[The Hub as an ORCID Certified Service Provider](#)

[ORCID and the New Zealand Research Information System](#)

[ORCID at the Royal Society Te Apārangi](#)

[Monthly ORCID reports](#)

ORCID

Connecting Research  
and Researchers

Member  
Organization

[Welcome to 2021](#)

We hope that all of our New Zealand ORCID consortium members had a restful break over the summer holiday and are easing back into the working week. We aim to work with many of you, individually, this year to help you begin your ORCID journey, if you haven't yet embarked on it. For those of you who have been successfully writing to your researchers' ORCID records for some time,

we hope to hear some stories about whether it is helping ease your administration burden. Sharing success stories helps to encourage other members who haven't yet started out.

### Town Hall

We held our second New Zealand ORCID consortium Town Hall event on 21<sup>st</sup> October 2020. We take this opportunity to reiterate our thanks all attendees and our presenters. Anne Scott spoke about the ORCID journey at University of Canterbury and Katharina Ruckstuhl told us about some really exciting work taking place, internationally, in the indigenous data management sphere, including a mock-up of how some innovations such as labels could be incorporated into ORCID records. We had an interesting question and answer session after the main presentations. A link to the recording for those who couldn't make it, but want to hear what was said is at:

<https://www.royalsociety.org.nz/orcid-in-new-zealand/orcid-in-new-zealand-news/2020-nz-orcid-consortium-town-hall-event/>

### ORCID webinar on indigenous data sovereignty

In October 2020, ORCID, along with the Global Indigenous Data Alliance (GIDA), hosted an online webinar on indigenous data sovereignty. This webinar described what is meant by the term indigenous data sovereignty, covered the FAIR principles for data (Findable, Accessible, Interoperable, and Reusable) and the CARE principles for indigenous data governance (Collective Benefit, Authority to control, Responsibility, and Ethics). A new initiative in the form of digital 'labels' (localcontexts.org) was described, along with early ideas on how these could potentially be introduced into ORCID records. The recording of the webinar is at

<https://attendee.gotowebinar.com/recording/621522447904526863> and the slides are at <https://doi.org/10.23640/07243.13229024.v1>

### ORCID and two factor authentication

Your users may not be aware of ORCID's two-factor authentication facility

Two factor authentication (2FA) offers an additional level of security when signing into a service. In addition to signing into ORCID using your ORCID ID or email address and password you can set up the ability to receive a one-use code that you also enter, as part of the login process. A 2FA app is required to create the code. ORCID have tested several apps including Authy, FreeOTP, Google Authenticator and Microsoft Authenticator.

ORCID has full instructions for setting up 2FA at <https://support.orcid.org/hc/en-us/articles/360006971673-Secure-your-account-with-two-factor-authentication>

From an ORCID membership perspective, you can allow people to sign into another system that you control via sign-in from ORCID. ORCID will tell you if they are using 2FA. If you want an extra level of security when users sign into your system you can make it a requirement that your users have 2FA implemented in ORCID to sign into your system via this route

Information about 2FA from a system sign-in perspective can be found on ORCID's Trello Board at - <https://trello.com/c/9LVa7TqK/146-add-amr-to-idtoken-so-integrations-know-if-someone-used-2fa-3>

## ORCID Member Survey

ORCID announced in their January newsletter that they will be running a member value research survey this year. This is being sent to each member organisation's main ORCID contact person. Please fill it in, if you are able. The results will help with ORCID's decision making and help them to serve the community's needs.

## The Hub as an ORCID Certified Service Provider

Recently, we were invited to take part in an Asia Pacific webinar on ORCID service providers. This was an ideal opportunity to showcase the NZ ORCID Hub to a substantial audience from a range of countries in the APAC region. We explained the background behind the Hub's conception and development, and showcased its functionality and ease of use. This webinar was recorded and a link to it should be available in time for the next newsletter.

## ORCID and the New Zealand Research Information System

ORCID is a key part of the New Zealand Research Information system: a national online hub of information about the country's research, science and innovation sector. Newsletters providing updates on this project are at <https://www.mbie.govt.nz/science-and-technology/science-and-innovation/research-and-data/nzris/newsletters/>

## ORCID at the Royal Society Te Apārangi

Since 2019, the Society has enabled Society members, and applicants to the schemes that we administer, to present authenticated ORCID ids. The Society is using these identifiers to simplify identification of people coming into these schemes; especially useful where people have shifted institutions or otherwise changed email addresses. The Society also intends to restart asserting funding success to ORCID records.

## Monthly ORCID reports

All nominated 'main contacts' for consortium members, as well as those nominated by main contacts, should be receiving ORCID's monthly newsletter. Please [contact us](#) if you expect to, but are not receiving it.

We are happy to take suggestions for other newsletter content. If there is something you'd like to read about please let us know.

Our contact address is [orcid@royalsociety.org.nz](mailto:orcid@royalsociety.org.nz)

Previous NZ ORCID consortium newsletters are to be found at the bottom of the '[about the consortium](#)' page of our website.
