

In partnership with the
Australian High Commission &
The Prime Minister's Science Prizes,
Royal Society Te Apārangi
presents

The future needs scientists!

Dr Ken Silburn, Sarah Johns, Terry Fenn, Jenn Corbitt (chair)

What skills will students need when they enter the workforce in 2030? Much of the world will be digitally and technologically-driven, so having an understanding of science and it's relevance will be beneficial and advantageous. But how should science be taught when considering the future? National science teacher prize winners Dr Ken Silburn from Casula High School in Sydney, Sarah Johns from Nelson College for Girls and Terry Fenn from Onslow College join Jenn Corbitt from the Science Teaching Leadership Programme (STLP) to discuss how teaching science has changed, but also how it needs to adapt when thinking of 2030. Characteristics of quality teaching will be explored as well as approaches to embolden students to seek solutions.

WELLINGTON
Australian High Commission
72-76 Hobson St, Thorndon
Friday 13 July 10am-12pm (noon)

All Welcome. Free Admission.

Registration is essential for entry:
